

Astronomy with the Naked Eye; A New Geography of the Heavens, with Descriptions and Charts of Constellations, Stars, and Planets (Paperback)

By Garrett Putman Serviss

Theclassics.Us, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1908 edition. Excerpt: . THE ZODIACAL LIGHT THIS mysterious phenomenon is not, strictly speaking, a stellar object, although it is unquestionably connected with a star--our own sun. Like the constellations and the Milky Way, it has long attracted a great deal of attention, although it is too indefinite to have any mythological associations, and even yet its nature is not well understood. The general opinion at present is that the Zodiacal Light is a faint extension of the sun's corona. It is generally described as a cone-shaped or lenticular light, rising above the western horizon after sunset and above the eastern horizon before sunrise, but not to be seen at all seasons. It is especially a naked-eye object, for it is too diffuse to be observed with a telescope, and attempts to photograph it are not very successful. The light lies in, or very...
