Not illustrated. 1908 Excerpt: .at which he and one of the experimenters could hear the tick. In each test, one of the experimenters stood beside the subject and also listened for the tick. It was thus observed whether or not he heard the tone at a greater distance than did the native; the distance at which the watch or the Politzer acuometer was audible to the experimenter always being the denominator of a fraction standing for the acuity of the native tested. Thirty-five natives were tested for hearing. Although the tests, as has just been indicated, were extremely rough, they served to show that Papuans, on the whole, do not hear as well as do Europeans, though some of the individual Papuans, indeed, heard better than did either Myers or Rivers. On their return to England, Myers compared his own hearing and that of Rivers with the hearing of other...
